Cybersecurity at MIT Sloan

Interdisciplinary Consortium for Improving Critical Infrastructure Cybersecurity (IC)[3]

Human Risk Management CAMS Roundtable
The Culture Club

October 24, 2024

Cybersecurity at
MIT Sloan

Subgroup Kick Off Meeting Agenda

Cybersecurity at
MIT Sloan

10:45am	Kick Off
5 Min	Introduction
20 Min	Hot Topics Discussion
45 Min	Case Study Discussion
5 Min	Wrap Up
Noon	Adjourn

Chatham House Rule

To encourage interactivity, we will use the Chatham House Rule:

"Under the Chatham House Rule, participants are free to use the information received, but neither the identity nor the affiliation of the speaker(s), nor that of any other participant, may be revealed."

3

Introductions

Please introduce yourself. Tell us your:
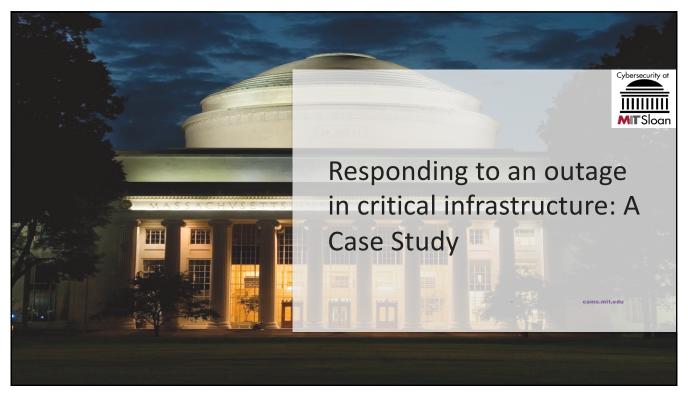

Name
Company
Position/Interest in Cybersecurity

4

Hot Topics Discussion:
What's On Your Mind Today?

Cybersecurity at
MITSloan

Audience Participation:
What question would you like to discuss with
this group today?

6

Case Discussion Format

Cybersecurity at
MIT Sloan

Take 15 min to read and discuss with your neighbor.

Then we'll do a full group discussion of the case

Cybersecurity at MIT Sloan
Interdisciplinary Consortium for Improving Critical Infrastructure Cybersecurity
Case Study

Managing An Outage in Critical Infrastructure:
The AT&T Incident of 2024*
Study Questions

This is a case study about resiliency in the face of critical infrastructure failure. Please read the case, and prepare your thoughts on these study questions:

1. What happened when the AT&T network failed in February 2024? What were some of the unintended consequences when the telecommunications network was no longer available?

2. How would your organization be impacted if the telecommunications network failed? What would be the biggest risks/impacts to your organization? Where are the risks?

3. What do you recommend your company/organization include in a resiliency plan for preparing for critical telecommunications infrastructure outage? What will you build for yourself personally so you are resilient should the network fail again?
